Tasks

Task 34

Pick a computer part and try to say something about it.

Task 35

Consider the points below and give your opinion. Make simple sentences using these expressions.

- There are many input devices of different types.
- There are two main categories of hardware: processors and peripherals.
- There is no better way to understand computer than through interacting with one.
- There are keyboards with different number of keys nowadays.
- There are two types of software: system and applications.

Task 36

Translate these sentences.

- ➔ Some people think that the internet and the Web are the same thing, but in fact they are different.
- ➔ The **internet** (often called simply "the net") is a global network of interconnected computers. These computers communicate with each other over existing telecommunications networks.
- ➔ The **World Wide Web** (usually known as just "the Web") is the billions of web pages that are stored on large computers called web servers/services.
- ➔ **Electronic mail** (email or e-mail) is a method of exchanging messages between people using electronic devices.
- ➔ **Chat** refers to the process of communicating, interacting and/or exchanging messages over the Internet. Two or more individuals can communicate through a chat-enabled service or software. Chat is also known as chatting, online chat or Internet chat.
- ➔ **Download** is to transfer (software, data, character sets, etc.) from a distant to a nearby computer.

Task 37

Let’s talk about social media applications. Explain which one is your favorite and why.

Task 38

Read and translate the definition.

➔ **Resolution** is typically described in PPI, which refers to how many pixels are displayed per inch of an image. Higher resolutions mean that there are more pixels per inch (PPI). Images with lower resolutions have fewer pixels.

high resolution

low resolution

Task 39

Translate these sentences.

- A web **search engine** or Internet search engine is a software system that is designed to search the World Wide Web in a systematic way for particular information specified in a textual web search query. The search results are generally presented in a line of results. The information may be a mix of links to web pages, images, videos, graphics, articles, research papers and other types of files.
- **Social media** are interactive technologies that allow the creation or sharing/exchange of information, ideas, interests, and other forms of expression via virtual communities and networks.
- A **blog** is an informational website published on the World Wide Web consisting of discrete, often informal diary-style text entries.
- An **Internet Service Provider** (ISP) is an organization that provides many different services for accessing, using, or participating in the Internet.
